

ABDUL HANAN

Full-Stack Software Engineer

hananaslam90@gmail.com | hananaslam.com | linkedin.com/in/hanan-aslam-dev | github.com/AbdulHanan49

Lahore, Pakistan | +92 321 2244286

Professional Summary

Full-stack engineer with **14 months of end-to-end product ownership**, from schema design to cloud deployment. Shipped **MixClip** from zero to **2,578 users** across 17+ countries, generating **EUR 300+ in daily Stripe volume** — leading a **cross-functional team of 4** (PM, designer, 1 developer) through the full system from schema design to Azure cloud deployment. Prior to this, completed a **6-month project engagement at Visnext** as the sole engineer, rebuilding Job Wallet's full frontend and backend under PM direction. Comfortable owning features end-to-end, collaborating across design, product, and engineering, and communicating technical decisions to non-technical stakeholders.

Work Experience

KCube Solutions — Full-Stack Software Engineer

Oct 2025 – Present

Lahore, Pakistan · Full-time

MixClip — AI Video Editing SaaS

- Designed and delivered MixClip across **4 integrated services** — React 18 / TypeScript / Vite SPA, Remotion 4 video rendering engine, FastAPI / PostgreSQL backend, and Google OAuth 2.0 / JWT auth — as the lead engineer in a **cross-functional team of 4** (PM, designer, 1 developer), scaling to **2,578 production users** across 17+ countries.
- Engineered a stateful video editor with undo/redo history (**Zustand**), real-time server-state sync (**TanStack React Query v5**), i18n for 17+ locales (**i18next**), and PWA support; drove performance optimization to achieve **0 Cumulative Layout Shift** and **130 ms Total Blocking Time**; maintained type-safe backend across **20+ REST endpoints** (SQLModel / Pydantic v2) with zero-downtime migrations via **Alembic**.
- Delivered multi-currency **Stripe** billing across **17+ currencies** generating **EUR 300+ in daily transaction volume**; integrated **Azure Speech SDK** for automatic subtitle generation and **Google Gemini AI** for AI-powered content assistance.
- Maintained **0 server errors** over 30 days via **Azure Application Insights**; automated deployments via **GitHub Actions CI/CD** with Docker multi-stage builds to horizontally scalable **Azure Container Apps**; authored **pytest** unit tests; managed async render queuing through **Azure Blob / Queue Storage**.

Visnext Software Solutions — Associate Software Engineer

Apr 2025 – Sep 2025

Lahore, Pakistan · Full-time

Job Wallet — AI-Powered Job Tracking SaaS

- Replaced a legacy frontend with **Vue 3 / Quasar Framework**, Pinia, and Tailwind CSS — delivering **10+ production screens** including drag-and-drop job pipelines, interview calendar, real-time notifications, and file management within a 6-month engagement.
- Designed and shipped **10+ Django REST Framework** APIs (job pipelines, CV resumes, subscription plans, notifications, file uploads) with JWT / RBAC security; integrated with an **ML-powered job analysis pipeline** for CV parsing and job field matching.
- Eliminated N+1 query patterns across high-frequency **Django ORM / MySQL** endpoints; architected **Celery + Redis** async task queue for interview reminders and subscription lifecycle automation; operated as **sole engineer** in a 2-person team, delivering all features end-to-end with task assignments and **PR reviews managed by PM**.
- Shipped **Stripe** freemium billing with **2 subscription tiers** (Basic \$0 / Unlimited \$10/mo) and idempotent webhook handling; built a dual-channel notification system (in-app + **SendGrid** email) for interview reminders and job status updates.

Technical Skills

Languages: TypeScript, JavaScript (ES2020+), Python, Java

Frontend: React 18, React Hooks, Vue 3, Quasar, Vite, Tailwind CSS, Zustand, TanStack React Query v5, PWA

Backend: FastAPI, Django REST Framework, Node.js, Express.js, ASP.NET, Celery, Redis, Pydantic v2, SQLModel, SQLAlchemy 2, Alembic, JWT, Google OAuth 2.0, pytest

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: Docker, Azure Container Apps, Azure Container Registry, Azure Blob / Queue Storage, Azure Application Insights, GitHub Actions CI/CD, Linux

AI & Integrations: Google Gemini AI, Azure Speech SDK, Stripe API, Remotion 4, SendGrid

Projects

Screen Sizzle — Movie Seat Booking System 2023

React.js, Node.js, Express.js, MongoDB, Stripe, Nodemailer

- Built a full-stack **MERN** movie seat booking platform with real-time seat availability, **Stripe** payment checkout, **Nodemailer** confirmation emails, and an admin dashboard for movie and showtime management.
- Engineered concurrent-safe **RESTful APIs** with Node.js / Express.js; implemented atomic seat-lock logic in **MongoDB** to prevent double-booking across simultaneous sessions.

SmartLib — Web-Based Library Management System 2024

ASP.NET, SQL Server, HTML, CSS, JavaScript

- Built a full-stack library management system with **ASP.NET** backend and **SQL Server** — dual-role access for librarians and patrons covering book cataloguing, issuance/return workflows, and automated overdue fine calculation.
- Implemented patron self-service features (browse, search by title/author/genre, book request), librarian account management, and inventory controls; designed a normalized relational schema tracking books, users, transactions, and audit logs.

Education

National University of Computer and Emerging Sciences (FAST-NUCES), Lahore

2020 – 2025

Bachelor of Science in Software Engineering
